

The Tech Safety Lines enables a rescuer to retrieve a trapped worker from deep inside a large interior space to the surface. The system features a re-assemble 4:1 haul system with sealed, high-efficiency pulleys to manage the weight of an incapacitated worker. The 36 meter Tag Line is attached to the worker entering the large area and is used as a retrieval line to bring the worker back to the surface.

The user-friendly system comes with all necessary components to extract an unconscious worker from a horizontally positioned large area.

The system includes
4:1 Haul System
Tag Line (36 m)
Anchor Strap
Carabiners
Tag
