

StepWise® Single Leg Fall Arrest Lanyard

Tech Safety Lines offers the patented **StepWise® Fall Arrest Lanyard**. The StepWise® contains a built-in webbed ladder that automatically deploys upon impact to aid the fallen worker. The ladder is attached to the lanyard, **not** the harness, providing a foothold from which to stand and relieve **all** pressure from the harness. This unique configuration transfers the weight above the worker's dorsal connection, **creating a place of refuge** while awaiting rescue.

Also incorporated into the **StepWise® Lanyard** is an anchor point for use in conjunction with the **SRK-11®**. By using these two tools together, a fallen worker can perform a Self-Rescue – safely lowering oneself all the way to the ground without assistance from other workers. Lanyard length and connective hardware can be customized to meet your company's specifications.

UL Certified as meeting ANSI/ASSE Z359.13-2013
Weight: 2.3 lbs.

Available as a 6 ft. FF Fall Arrest Lanyard
